DETAILED ACTION

Claim Rejections - 35 USC § 103

1. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paul, 4873809 in view of Rogers, 4580387.

Paul discloses a clip (10) for use in a suspended ceiling having beams (28), wherein the clip is formed from steel. The clip has a relatively flexible section formed that has cross section dimension narrower than the leg or u-shaped arm section of the clip (figure 7, see notch in-between leg (22) and arm (16)). Paul fails to disclose a clip formed from a synthetic resin.

Rogers discloses forming a ceiling hold-down clip (8) from a plastic material (col. 4, line 6). Therefore, it would have been obvious to a person having ordinary skill in the art to have made Paul's clip from a plastic material to reduce the cost of manufacturing the clip, i.e., cost of plastic material is cheaper than spring steel. When Paul's clip is made from a plastic material, it will still retain the features of having a hinge that is relatively flexible due to its smaller cross-sectional dimension and leg and arm portions that are relatively rigid due to their larger cross-sectional dimensions.

Regarding claim 2, the limitations of the process of dual extrusion are considered inasmuch as to the structural limitations implied by the process steps. In this case, the clip will have the final structural limitation of being a single piece clip. This limitation is met by Paul. Paul discloses a single piece clip.

Regarding claim 3, the examiner takes Official Notice that polyvinyl chloride is a well known material for making plastic clips. Therefore, it would have been an obvious

design choice to make the clip from PVC, since PVC is readily available and inexpensive.

Regarding claim 4, Paul discloses tabs (24) on the inside of the "u" for locking the clip to the grid beam (figure 10).

Regarding claim 5, Paul discloses rounded portions (22) on the bottom of the legs.

Response to Arguments

2. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
